

OYA Renewables is a North American full-service solar developer and independent power producer. Its projects provide clean energy and widespread economic and environmental benefits for landowners, communities, and energy customers. It is committed to developing and operating solar projects, with a particular focus on community solar, that incentivize the participation of low-to-moderate income households.

Founded in 2009, OYA is the first North American solar platform to have been certified as a diverse supplier and minority business enterprise. We have successfully monetized in excess of 1,400 MW_{DC} of distributed and utility-scale solar projects across North America and our current development pipeline exceeds 3 GW_{DC}.

Director - Construction

We are currently seeking a Director – Construction with 10-15 years of solar project development and construction experience to manage the construction of a portfolio of solar projects. This is a hands-on role, involved in every aspect of construction management for Solar Projects.

Responsibilities:

- Lead and expand our existing Engineering, Construction teams to support aggressive growth targets.
- Lead the construction agenda for all projects with an emphasis on budgets, schedules and bidding strategies in coordination with the executive management and finance teams.
- Negotiate and execute EPC contracts that will enable the company to achieve its annual construction targets.
- Develop, implement and improve full-cycle EPC processes for all solar projects including but not limited to rooftop, carport, ground mount, community solar, and utility scale solar and solar+storage projects ranging up to 250MW.
- Support the origination, development, finance and asset management team's engineering, equipment and performance requests as required to develop, finance and manage our solar and solar+storage plants.
- Act as the company's primary stakeholder for all project related vendors, including subcontractors (O&M, construction, engineering, equipment, and technology).
- Advanced level negotiations of EPC warranty contracts that cater to each plant's long term financial goals.
- Assist the Development team to achieve annual targets for DG (Community Solar, BTM and FTM) and Grid Scale Projects.

Requirements

- A minimum of 10 years of hands –on experience in engineering and construction with a Degree in Engineering, Planning, Business, or a related field.
- In depth knowledge of full scope Construction Operations ranging from product development through to construction/project completion.
- Proven experience creating and sustaining a positive team culture that delivers a high level of quality, customer service and stakeholder satisfaction.
- Demonstrated ability to effectively in a fast paced and ever-changing environment.
- This position is ideal for candidates who work well in lean, entrepreneurial organizations with a shared vision and commitment to excellence.
- Exceptional communication, organization and critical thinking skills are essential for success in this role.

Location

Toronto, Ontario
